The Eco-Burger Promise

At Eco-Burger, our goal is to provide you with the **morally delicious** joy of mouthwatering **all-natural** burgers, fries and milkshakes while also contributing to **environmental sustainability**.

Our burgers are made with **100% grassfed beef**—a much healthier choice compared to “fast food” options because it's **leaner** and **higher in vitamins and proteins** than grain-fed beef. Many of our ingredients are **local and organic**, and because Eco-Burger uses only **unprocessed** goods, you know you're eating real food that's real good.

We proudly **recycle and compost** 95% of our waste, all our **packaging is compostable** and our fryer oil is converted to biodiesel, a renewable energy source that helps reduce greenhouse gasses. From **LED lightbulbs, solar panels** and **wind-powered energy** to **water-saving bathroom fixtures**, Eco-Burger knows how to conserve precious resources. And from **recycled glass countertops** to **beetle-kill pine paneling**, we also know how to reuse materials that typically end up in landfills.

Come on in and enjoy an Eco-Burger, and feel good about supporting business that strives to support your health and the environment.
